Compliance and enforcement procedures are applicable with the appropriate correspondence provided if not registered.

**Pond and Drainage Banks** – Overtime pond banks and drainage areas may experience some erosion and create ruts and rills making the areas unstable and difficult to use and maintain. In some cases, is recommended to let the natural vegetation grow in key areas in order to stabilize the slopes. This usually takes place at the bottom of the drainage area and or at water's edge around ponds. Over the next couple of months, Ideal Homes Development will be identifying key areas around ponds and drainage areas to establish proper growth.
